

I am writing to oppose the above-referenced Docket Number. The value of translator service for FM broadcasters is huge, with hundreds of thousands listeners in remote areas not normally reached by traditional broadcast methods. As a resident of an area that is not reached by my favorite translator service, K-LOVE Radio, I must rely upon streaming internet to listen at my office for the content and value of K-LOVE's message and encouragement. If K-LOVE were limited to broadcast methods of communication, the content of LPFM broadcasts would not be as worthy of my listenership or financial support. I believe the service provided by K-LOVE and other translator service broadcasters is in the best interests of the public because the quality and non-commercial aspects of K-LOVE are of the highest quality and most beneficial impact to the general public. The same would not be true of LPFM broadcasters, whose radical and limited perspectives of broadcast rights are not consistent with the majority view of the general public. Thank you for the opportunity to make comment on this Docket Number 04-233 initiative and I hope the measure will be tabled or withdrawn.
